DETAILED ACTION

Drawings

The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81. No new matter may be introduced in the required drawing.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the infusion pump, computer, blocking device, memory, quantitative figure, comparator external control device, first computer, and second computer must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The drawings are objected to under 37 CFR 1.83(a) because they fail to show any structures of the apparatus as claimed and as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Examiner did not find disclosed in the specification, a blocking device, a quantitative figure, a first computer and a second computer.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6-12 are rejected under 35 U.S.C. 102(b) as being unpatentable over Fischell (WO 84/03218). Fischell discloses an implantable infusion pump within the body of the patient that can be operated by an external control device to deliver an amount of a medicament to the patient, comprising an electronic control device, a computer, a blocking device, a memory, a comparator, a first computer that operates the infusion pump, and a second computer that operates the external control device.

Claims 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Petre et al (US 4,392, 849). Petre et al discloses an infusion pump for the delivery of an amount of a medicament to the body of a patient, comprising an electronic control device, a computer, a blocking device (54), a memory, and a comparator (46).
